THE WORLD'S MOST ADVANCED PIANOS

907 SERIES

DESIGNER STUDIO PIANOS

The 907 Designer Studio Pianos offer the discerning pianist the best of both worlds... magnificent styling and extraordinary performance. With regal designs and graceful nuances, they are true **objets d'art** that add a wealth of beauty and style to any home.

THE WORLD'S MOST PRECISE PIANO ACTION

The 907 Designer Pianos feature our exclusive Ultra-Responsive™ Direct Blow action that offers extraordinary touch. Hammer heads are made with 100 percent wool felt. Hammer shanks and mouldings are made with top-quality maple. To make the action resistant to climatic and seasonal changes in temperature and humidity, we pioneered the use of aluminum action rails, aluminum hammer rest rails and precision parts made of stable, low-friction ABS Styran.

SOUNDBOARDS AND RIBS

The most important sound-producing parts of a piano are the soundboard and ribs. The choice of materials and the manner in which they are assembled can greatly affect volume and tone quality. Our wood technologists select only the finest spruce to ensure exceptional dynamic range and superb tone across the entire spectrum of sound. The 907 Designer Pianos boast an exceptionally large soundboard area (2,062 sq. in.) for greater tonal power and resonance.

DESIGNER FEATURES

Each of the 907 Series models features exotic wood inlays, attractive “designer” music racks, stylish sculptured legs and a “grand style” fallboard. The lid opens from the side in the style of a grand piano.

TUNING PINS

The 907 Series tuning pins are 64mm in length and manufactured to rigid specifications with nickel-plated carbon steel. Our precision thread-cutting process produces a pin with tremendous “reverse-grip” holding power.

BACK POSTS

Back posts support the plate and help maintain its structural integrity over the life of the piano. Our laminated back post construction is designed for maximum rigidity to provide enhanced tuning stability and decades of reliable performance.

BUILT FOR LASTING PERFORMANCE:

EXCLUSIVE ABS STYRAN ACTION PARTS

The innovative use of ABS Styran in our piano actions is one of the chief reasons why a Kawai piano will maintain stable touch and tone over time better than other pianos. Endorsed by leading piano technicians and proven superior in scientific tests, ABS Styran is supported by over thirty-five years of proven reliability in Kawai pianos.

BRIDGES

The 907 Series bridges are made from select hard maple, individually notched for a clear, powerful tone quality. Height is carefully set and matched to the iron plate for correct string pressure and optimal tonal transfer.

"MATCHED STRENGTH" PLATE DESIGN

The cast iron plate is subjected to as much as 20 tons of string tension. Kawai uses state-of-the-art CAD technology to match the strength and natural tonal resonances of the plate to the requirements of the plate design. The proper combination of plate design, back post structure and string tension provides enhanced tuning stability for decades of reliable performance.

LONGER KEY STICKS

The 907 cabinet is built with added depth (27") to accommodate a longer key length for better control. The extended 16 1/2" keys offer greater leverage at every point of the playing surface for a more even, controlled touch.

PINBLOCKS

The pinblock must be constructed and finished to the highest quality standards to ensure optimum tuning stability over many years of use. The 907 Series pinblock is made from the finest hard rock maple, cross-laminated in 13 plies to assure that the tuning pins remain tightly fitted through a lifetime of music-making.

CAST BRASS PEDALS

Our exclusive Cast Brass Pedals are extremely rugged. Made with a permanently bonded brass layer over an aluminum core, they are significantly stronger and more durable than conventional "capped" pedals for lasting beauty and silent operation.

SQUARE-TUBE PEDAL LEVERS

Stronger than conventional round levers, the square-tube pedal levers on the 907 provide a flat surface for pedal wing nuts to reduce the possibility of noise when the pedals are depressed.

TEN YEAR FULL WARRANTY

To ensure your peace of mind and protect the value of your investment, every Kawai upright piano is covered by our Ten Year Fully Transferable Warranty. This warranty is the seal of Kawai craftsmanship... and the assurance of your satisfaction for many years to come.

The Epitome of Elegance

Kawai selects only the finest woods for the striking cabinets of the 907 Series. Premium grade Mahogany and Cherry provide the essential character of the two distinctive case designs.

Burl Ash and Sapeli Mahogany are added to offer plush contrast as decorative inlays. Finely sculptured legs are custom crafted to further convey the stylistic theme of each model. The elegant ornamentation on each lower panel and the “grand style” fallboard (evoking the feeling of a much larger piano) bring the designer’s art to completion.

Yet, beneath each exquisite exterior resides a superb musical instrument that will provide generations of artistic enjoyment. A taller 46 1/2" scale design provides an unusually large soundboard area (2,062 sq. in.) that combines with a premium solid spruce soundboard and exceptional hammers to give voice to its resonant tone. Our exclusive Ultra-Responsive™ Direct Blow Action promises exceptionally consistent touch and feel.

ENGLISH REGENCY MAHOGANY

With an extraordinary synergy of tone, touch and beauty, the 907 Designer Piano is certain to provide a superlative musical experience.

Height:	46 1/2" (117cm)

The Never-Ending Quest For Perfection

There is no more compelling reason to build an exceptional piano than one's own name on the instrument. For three generations, the Kawai family has blended knowledge, skill, technology, and heart... in the quest to perfect the art of the piano.
